Objet: Application for PFE Internship 2025–2026

To the attention of the  
Capgemini Recruitment  
Team,

Dear Hiring Manager,

I am writing to apply for the PFE Internship for the 2025–2026 academic year at Capgemini in Sala Al Jadida, Casablanca.

I am currently a final-year Master's student in Computer Science with a specialization in Data Science and Artificial Intelligence. Throughout my academic and professional experiences, I have developed solid skills in Python, Machine Learning, Data Analysis, and web-based solutions. I have also worked on practical projects involving NLP, OCR solutions using cloud services, and data-driven applications.

I am highly motivated to join Capgemini because of its strong expertise in technology, its innovative projects, and its international and inclusive work environment. This internship represents an excellent opportunity for me to apply my technical skills, learn from experienced professionals, and contribute to impactful projects for major clients.

I am a motivated, adaptable, and curious person, with a strong interest in continuous learning and teamwork in Agile environments. I would be honored to contribute to your teams and grow professionally within Capgemini.

Thank you for considering my application. I would be happy to discuss my profile and motivation in more detail during an interview.

Yours sincerely,

Mohammed Anas Legssyer
